Innovation Action

Horizon 2020, Research and Innovation Programme

Grant Agreement Number 687786

Dissemination level	CO
Contractual date of delivery	30/06/2017
Actual date of delivery	30/06/2017
Deliverable number	D4.2
Deliverable name	<i>Framework and Workflows for UGC Copyright Management</i>
File	<i>InVID_D4.2_v1.0</i>
Nature	<i>Report</i>
Status & version	<i>Final, V1.0</i>
Number of pages	76
WP contributing to the deliverable	4
Task responsible	<i>UdL</i>
Other contributors	
Author(s)	<i>Roberto García, Maria Teixidor, Paloma de Barrón, Rosa Gil, Albert Berga / UdL</i>
Quality Assessors	Gerhard Rudinger / APA-IT Max Göbel / WLT
EC Project Officer	<i>Miguel Montarelo Navajo</i>
Keywords	<i>Copyright, UGV, legal, reuse, journalism</i>

**Abstract:**

This deliverable performs a detailed analysis of the legal requirements identified in D6.1. The "specification by example" methodology is used, based on specific scenarios for each feature that can be then implemented to automatically test if all requirements are satisfied. The analysis is also used to design the Rights Module architecture, the rights framework where this module operates and the workflows for the two main stakeholders, journalists and content owners. The framework includes copyright exceptions guidelines and the copyright model, the entity model used by this module and its semantic extensions based on the Copyright Ontology that enable automated reasoning about copyright terms, policies and agreements.
